PROFILE

Born on November 10, 2000, I am an undergraduate Computer Science student at Harokopio University of Athens, currently working on my thesis in the field of DevOps. Throughout my academic and professional career, I have gained hands-on experience in developing and deploying software applications using technologies such as Spring Boot, Git, Docker, Jenkins, and Kubernetes. I am particularly interested in DevOps practices and am an enthusiastic individual who actively follows the latest developments in technology.

Professional EXPERIENCE

Information Systems Manager ,

BioTech Scientifics P.C, Athens,

2020-Present

My responsibilities included Linux system administration with user access control and permissions management, on-premise IT infrastructure and internal systems maintenance, automation of developer workflows using Image-Pro and ImageJ macros, troubleshooting and customization of scientific imaging software such as cellSens, NIS-Elements, and Fuzion, frontend website development, and providing technical demonstrations and training sessions to staff and clients. I also acted as an IT consultant by assessing customer requirements, recommending cost-effective equipment solutions, and implementing a private cloud system for secure file sharing and collaboration.

Personal Projects

- **Personal Website**

  Designed and developed a personal website to showcase projects and technical skills.

- **Crowdfunding Web Application (Spring Boot, Vue.js, PostgreSQL)**

  Developed a secure and scalable crowdfunding platform using Spring Boot, Vue.js, and PostgreSQL.
  Deployed the system on an Azure virtual machine using Ansible and Jenkins CI/CD pipelines, and implemented continuous delivery to Kubernetes through ArgoCD and Docker Compose.

- **Bachelor Thesis – DevOps Architecture without Vendor Lock-In: Dynamically Programmable Pipelines for Unified IaC, GitOps, DevSecOps, and FinOps**

  Designed and implemented a cloud-agnostic DevOps architecture aimed at eliminating CI/CD vendor lock-in through dynamically programmable pipelines.
  The thesis integrates Infrastructure as Code (IaC), GitOps workflows, DevSecOps security automation, and FinOps cost-optimization practices into a unified continuous delivery and governance framework.

EDUCATION

Bachelor of Science in Computer Science

Harokopio University,
Athens,

Graduated: February 2026

LANGUAGES: English

INTERESTS / LEARNING FOCUS

- Systems Architecture & Design
- Distributed Systems
- Cloud Infrastructure Engineering
- Platform Engineering
- Kubernetes at scale
- Infrastructure as Code (IaC)
- Reliability Engineering (SRE)
- Observability & Monitoring Systems
